

# FUEL CELL BIPOLAR PLATE GASKET

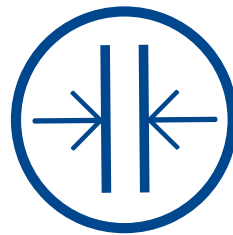

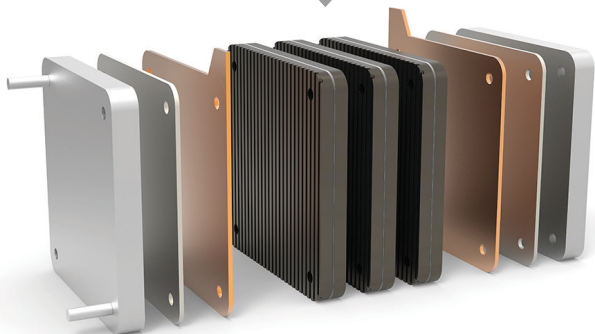

Reliable sealing solution for bipolar plates

H<sub>2</sub>

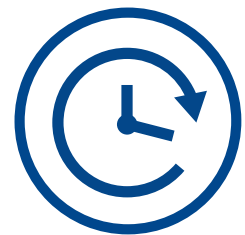

TO BLOCK

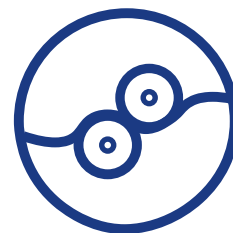

Nitto's bipolar plate gaskets ensure a perfect gas-tight seal of the bipolar plate to the MEA (Membrane Electrode Assembly) in hydrogen fuel cells. It is a filmic solution with a superior leak resistance, which can be applied on both the anode- and cathode side of the bipolar plate.

reliable sealing solution

improved durability

perfectly suitable for roll to roll production
